

Objectives

The objective of the Class Fund is to maximise long-term capital growth by investing in an actively managed portfolio of primarily pan-European equities. The principal investment objective and policy of the Class Fund will be adhered to for at least three years from the date of admission of Participating Shares of the Class Fund to the Official List of the ISE other than in exceptional circumstances and then only with the consent of a majority of Shareholders.

Portfolio costs (TER, TC and TIC)

Fund Class	TER (12 m)	TER (36 m)	TC (36 m)	TIC (36 m)
Class B	0.59%	0.59%	0.11%	0.70%

Total Expense Ratio (TER): This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over a rolling three years (where applicable) and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.

Transaction Costs (TC): The percentage of the value of the fund as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a transaction cost is not readily available a reasonable best estimate has been used. Estimated transaction costs may include Bond, Money Market and FX Costs (where applicable).

Total Investment Charges (TIC): The percentage of the value of the Fund incurred as costs, relating to the investment of the Fund. As fund returns are reported after deducting all fees and expense, these costs (the TER & TC) should not be deducted from the fund returns. It is the sum of the TC & TER.

Statutory disclosure and general terms & conditions

Collective Investment Schemes in securities are generally medium to long-term investments. The value of participatory shares may go down as well as up and investors may get back less cash than originally invested. Past performance is not necessarily a guide to future performance. An investment in the participations of a collective investment scheme in securities is not the same as a deposit with a banking institution. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Participatory share prices are calculated on a net asset value basis, which is the total value of all assets less liabilities in the Class Fund including any provisions made for any purchase, fiscal or other charges that would have been incurred had all the assets of the relevant Class Fund been bought or sold at that time, divided by the number of participatory shares in issue. Please refer to the prospectus for more details on the fees and charges that may be recovered from the Class Funds. The participatory shares of STANLIB Funds Limited are priced daily using the forward pricing method, these prices are available on the Manager's website (www.stanlib.com).

The Class Funds of STANLIB Funds Limited may borrow up to 5% of the market value of the Class Fund to bridge insufficient liquidity as a result of the redemption of participatory shares or to defray operating expenses. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Performance is calculated for the portfolio, and the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

Class Fund valuations are released at 12h30 (UK time) each business day using the prior day close of market prices. Transaction requests received before 14h30 (UK Time) will receive the following day unit price. This is an accumulation portfolio and does not distribute income.

A schedule of fees and charges and maximum commissions is available on request from STANLIB Collective Investments (RF) (Pty) Limited, ("STANLIB"). The Class Funds of STANLIB Funds Limited may declare dividends if there is sufficient net income available in the relevant Class Fund. Performance is quoted in US Dollar terms. Please refer to the prospectus of this scheme for more details, a copy of which is available on request from STANLIB Collective Investments (RF) (Pty) Limited, the address of which is 17 Melrose Boulevard, Melrose Arch, 2196, South Africa. STANLIB Funds Limited is regulated as a Collective Investment Fund by the Jersey Financial Services Commission. The Custodian and the Manager are both regulated by the Jersey Financial Services Commission to conduct Fund Services Business. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio.

The registered office of the Manager is Standard Bank House, 47-49 La Motte Street, St Helier, Jersey, Channel Islands. The Trustee is Apex Financial Services (Corporate) Limited, 12 Castle Street, St. Helier, Jersey, Channel Islands.

A representative agreement exists between STANLIB Collective Investment (RF) (Pty) Limited and STANLIB Fund Managers Jersey Limited. The representative for the fund in South Africa is STANLIB Collective Investments (RF) (Pty) Ltd.

Liberty is a member of the Association of Savings.

Additional information

Additional information about this product, including brochures and application forms can be obtained from the Manager, free of charge and from the website www.stanlib.com.

The prices of unit trust funds are calculated and published on each working day. These prices are available on the Manager's website (www.stanlib.com) and in the South African printed news media.

Risk rating explanation

The risk rating seen above is designed to give an indication of the level of risk, measured by volatility, associated with this specific portfolio.

In order to arrive at the specific risk rating of the portfolio in question, STANLIB measures the volatility of the fund, in the form of standard deviation, over a three year rolling period, and compares the result to internal risk parameters. Please note that these risk ratings are designed as guide only.

Fund management

Columbia Threadneedle Investments were appointed by STANLIB as the sub-portfolio manager. Columbia Threadneedle Investments is a leading global asset management group that provides a broad range of actively managed investment strategies and solutions for individual, institutional and corporate clients around the world. Columbia Threadneedle Investments is the global asset management group of Ameriprise Financial, Inc. (NYSE: AMP), a leading US-based financial services provider. As a part of Ameriprise Columbia Threadneedle Investments are supported by a large and well-capitalised diversified financial services firm.
