

Quarterly Report 31 December 2023

Commentary and analysis

Market overview

The STeFI Composite returned 2.1% in Q4 and was up 8.0% for the year. 6- and 12-month NCDs contributed the most to its return in past year as they were up 8.2% and 8.8% respectively.

The higher for longer sentiment that ensued in Q3 quickly changed in Q4. As early as in November, market participants started pricing lower interest rates and in December, the US Federal Reserve gave these expectations credibility when it left interest rates unchanged in its final meeting of the year, suggesting that it had hit peak interest rates. Bond yields in many countries welcomed the new environment, in the US, yields on 10-year bonds fell from 4.6% in Q3 to 3.9% in December, in Europe they fell by 80 basis points to 2.0%. Inflation in both regions also remains on a downward trajectory.

In South Africa, the yield on 10-year government bond dropped a 100-basis point to 11.4% in Q4. Inflation moderated to 5.5% in November having hit a peak of 7.8% in July 2022. Analysts at Bank of America are looking for inflation to average 5.0% in 2024 and accordingly see 0.75% in interest rate cuts starting in July (post the national election tentatively planned for the second of third quarter of 2024).

Asset class performance (%)

Local	Q4 2023	1 year	3 years	5 years	International	Q4 2023	1 year	3 years	5 years

Portfolio review

The fund outperformed its benchmark in Q4 by 60 basis points and is ahead by 120 basis points in the past year. Performance over the long term is also ahead.

ALUWANI, our higher duration mandate, recovered strongly from its Q3 negative alpha. As yields fell during the quarter, the manager's 16% exposure to government bonds contributed positively. In the past quarter, The R2030, R2035 and R2040 bonds it holds returned 7.7%, 9.7% and 8.7% respectively, way higher than the STeFI Composite's 2.1% return.

The STANLIB mandate also did well in Q4 and was the second highest contributor to performance in the past year. Its exposure to floating rate bonds benefited from higher interest rates.

Prescient runs a defensive mandate and while the manager did very well in Q3 when the market was concerned about higher interest rates for longer, it produced a return lower than the two managers in Q4 albeit still ahead of the benchmark.

Relative to peers, the fund had a good quarter. Long-term performance is also comfortably ahead.

Portfolio positioning and outlook

The fund has a yield closer to 10%, thanks to the SARB's hiking cycle in the past two years. Given the high yields offered by government bonds, it also holds almost 8% in bonds.

Looking forward – it is now consensus that the US Federal Reserve is done with its hiking cycle and the next move will be a cut, expected as early as March 2024. In 2024, we will be monitoring closely whether the US Fed can manufacture a "soft-landing" for the US economy or whether it succumbs to a recession which has been so widely predicted by the market. While we feel a soft landing is more probable, we are concerned that with 1.5% in interest rate cuts already priced into the US bond market investors may be disappointed if the Fed's expectation of only 0.75% in cuts comes to fruition. In South Africa, the forward rate agreements imply that interest rate cuts will only start in the last year quarter of the year.

Given all the uncertainty, panic selling of instruments is noticeable and, in such environments, alpha opportunities open. We trust the managers in the fund to take full advantage of those opportunities.

The commentary gives the views of the portfolio manager at the time of writing. Any forecasts or commentary included in this document are not guaranteed to occur.

Change in allocation of the fund over the quarter

Asset type	Q4 2023	Q3 2023	Change
Domestic Cash	4.74	2.69	2.05
Domestic Fixed Interest	-0.19	-0.13	-0.05
Domestic Fixed Interest Corp	72.64	75.23	-2.59
Domestic Fixed Interest Govt	6.78	6.11	0.66
Domestic Money Market	16.03	16.10	-0.07

The portfolio adhered to its portfolio objective over the quarter.

Fund classes

Class	Type	TER	Price (cpu)	Units	NAV (Rand)
B1	Retail	0.61	101.34	64,399,337.59	65,263,013.12

All Price, Units and NAV data as at 31 December 2023.

Units - amount of participatory interests (units) in issue in relevant class.

TER - 1 Year Total Expense Ratio (%) including VAT as at 30/09/2023.

Disclosures

Information to be considered before investing

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The STANLIB Multi-Manager Enhanced Yield Fund is a portfolio of the STANLIB Collective Investment Scheme (the Scheme). The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager. The trustee of the Scheme is Standard Chartered Bank.

This is a portfolio that derives its income primarily from interest-bearing instruments. The yield (if shown) is a current effective yield calculated daily.

Unit price – how it works

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 15h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

The payment of withdrawals may be delayed in extraordinary circumstances, when the Manager with the consent of the Fund trustees deems this to be in the interest of all Fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the Fund. When the suspension of trading relates to only certain assets held by the Fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued but, will delay liquidity on the affected portion of the Fund. If the Fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force the Manager to sell the underlying investments in a manner that may have a negative impact on remaining investors of the Fund.

Performance information

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 31 December 2023. Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager. Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Total Expense Ratio (TER) and Transaction Costs (TC) = Total Investment Charge (TIC) and other fees

The TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER is a measure of the actual expenses incurred by the fund over a one and three-year period (annualised). This includes the TER charged by any underlying fund(s) held as part of this Fund. A high TER does not necessarily imply a poor return nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TER's.

Transaction costs are disclosed separately. Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The sum of the TER and Transaction Costs is shown as the Total Investment Charge (TIC).

Annual management fee: The Fund charges a fixed annual management fee (i.e. fee class) as a percentage of the assets under management, to ensure a simple and understandable fee structure. The Fund invests primarily in segregated mandates but may also invest in other unit trusts i.e. "Underlying Fund Fees", which are included in the Total Expense Ratio (TER). The annual management fee is accrued daily and paid on a monthly basis.

Advice fees: If an investor appoints an adviser, advice fees are contracted directly between the investor and the adviser. The Manager will facilitate the collection of advice fees only upon receiving an investor's instruction to do so. Initial advice fees up to a maximum of 3.45% are collected prior to units being purchased and ongoing advice fees up to a maximum of 1.15% are collected monthly through the redemption of units held by an investor in the Fund. An investor may cancel the instruction to facilitate the payment of advice fees at any time.

STANLIB Multi-Manager does not provide financial advice

The investments of this portfolio are managed, on behalf of the Manager, by STANLIB Multi-Manager a division of STANLIB Asset Management (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 719, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.
