

Fund Information

STANLIB Multi-Manager

STANLIB Multi-Manager a division of STANLIB Asset Management (Pty) Ltd was established in 1999 and is the centre of excellence for multi-managed solutions within STANLIB.

The investment team, led by Chief Investment Officer Joao Frasco, consists of an experienced team with a diverse set of investment skills. We have offices in Johannesburg and London, and currently have mandates in excess of R150 billion under stewardship.

What is the fund's objective?

The Fund's objective is to provide moderate long-term growth of capital and good income, with a low probability of capital loss over the medium term. It aims to outperform CPI (South African Inflation) plus 5% p.a. (i.e. to provide a real return of 5% p.a.) over rolling 5-year periods.

Portfolio characteristics

What are the investment guidelines?

The Fund adopts a specialist approach whereby exposure to each asset class is gained via a multi-managed building block.

The tactical exposure to each asset class is actively managed around a strategic asset allocation that has been designed to meet the long-term return and shorter term risk objectives of the Fund. The Fund's maximum equity exposure (including international equity) is 75% of the portfolio – as per the ASISA South African Multi-Asset High Equity category as amended from time to time.

Fund's Composite Benchmark/Strategic Asset Allocation (SAA): SA Cash (STeFI Composite) – 7.5%, SA Bonds (JSEASSA TR All Bond) – 12.5%, SA Property (FTSE/JSE ALPI/SAPY) – 10%, SA Equity (FTSE/JSE Capped SWIX) – 48%, Global Equities (MSCI AC World IMI (ZAR)) – 15%, Global Bonds (Barclays Global Multiverse (ZAR)) – 5%, Global Cash (1-month USD LIBOR (ZAR) and 1-month EUR LIBOR (ZAR)) – 2%.

The Fund complies with provisions of the Collective Investment Schemes Control Act, No. 45 of 2002 and the Regulations thereto, as amended from time to time, and complies with Regulation 28 of the Pension Funds Act.

How is the fund managed?

The Fund is designed to deliver superior investment returns more consistently than through a single asset manager or mandate.

Our approach allows investors to outsource the fund/manager selection decision, which includes the ongoing due diligence of managers and construction of portfolios, to meet pre-defined objectives over time.

STANLIB	Prescient			STANLIB	BlackRock
	STANLIB			Truffle	Brandywine
				Visio	Hosking
					PIMCO
					Sanders
					Sands
					Veritas

How do we select managers?

STANLIB Multi-Manager follows a rigorous and disciplined manager research and selection process that starts by analysing the sector for which the portfolio is being built, and determining the key drivers of outperformance.

The manager research team conducts thorough quantitative and qualitative analyses, culminating in an extensive investment due diligence to identify those managers that have the skill and ability to outperform. This results in the production of high conviction buy/hold/sell lists, as well as mandate performance expectations under different environments, defining events and sell triggers/disciplines.

The portfolio management team then constructs a framework for blending managers into the portfolio that targets the key areas of outperformance and promotes diversification. We only entrust our client's assets to the highest quality managers, who are then selected into this framework to provide the portfolio with exposure to these sources of market outperformance over the long term.

Passive alternatives are considered in the process and where used, these help to lower portfolio costs.

On a regular basis the portfolio is reviewed to ensure it is delivering on its long term objectives. From time to time changes are made to improve the structure and or risk return profile of the portfolio.

The fund forms part of our specialist multi-asset range

	Growth assets vs defensive assets	Indicative volatility range	Investment objective
STANLIB Multi-Manager Enhanced Yield Fund	0% 100%	0.3% - 0.6% p.a.	To outperform the STeFI Composite
STANLIB Multi-Manager Low Equity FoF	30% 70%	3% - 6% p.a.	CPI + 3% p.a. over 3-year rolling periods
STANLIB Multi-Manager Medium Equity FoF	55% 45%	5% - 10% p.a.	CPI + 4% p.a. over 4-year rolling periods
STANLIB Multi-Manager Medium-High Equity FoF	68% 32%	6% - 12% p.a.	CPI + 5% p.a. over 5-year rolling periods
STANLIB Multi-Manager High Equity FoF	78% 22%	7% - 14% p.a.	CPI + 6% p.a. over 6-year rolling periods
STANLIB Multi-Manager Diversified Equity FoF	100% 0%	10% - 20% p.a.	CPI + 7% p.a. over 7-year rolling periods

Growth assets are defined as equities and property

How do we approach risk management in the fund?

Risk management is a fundamental component of our investment philosophy and process and is therefore approached holistically. It permeates every part of our investment process, requiring participation and accountability from all individuals involved in the process.

As a multi-manager, our risk management process begins at the time of portfolio specification and design, because by the time securities are included in the portfolio by the underlying managers, one has already accepted the risks and has limited ability to mitigate them. Our process then moves to manager research and portfolio construction, where we seek to know the managers intimately and construct a portfolio to behave in line with our broader investment objectives.

"Risks Inherent in our Funds" is a document that classifies the sources of risk associated with the management of our Funds. It can be obtained from the website www.stanlibmultimanager.com.

Monthly Fact Sheet

Investment description

The Fund adopts the specialist approach whereby exposure to each asset class is gained via a multi-managed building block. It is well diversified across domestic and foreign asset classes. Its main objective is to provide moderate long-term capital growth and income, with a low probability of capital loss over the long term. The Fund aims to achieve CPI+5% p.a. over 5-year rolling periods. The Fund is exposed to multiple best-of-breed managers, investment styles, asset classes and strategies providing investors with great diversification benefits. The tactical exposure to each asset class is actively managed - expected total equity content of between 60% and 70%. The Fund is regulation 28 compliant.

Suitable investors

- Who wish to diversify single manager risk;
- Who want a multi-asset class solution;
- Who seek inflation beating returns with moderately aggressive levels of risk;
- Who typically have an investment horizon of at least six years

Disclosures

Information to be considered before investing

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The STANLIB Multi-Manager Medium-High Equity Fund of Funds is a portfolio of the STANLIB Collective Investment Scheme (the Scheme). The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager. The trustee of the Scheme is Standard Chartered Bank.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

This portfolio is a Fund of Funds portfolio. A Fund of Funds portfolio is a portfolio that invests in other portfolios of collective investment schemes, that levy their own charges, which could result in a higher fee structure for the Fund of Funds portfolio.

Unit price – how it works

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 24h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

The payment of withdrawals may be delayed in extraordinary circumstances, when the Manager with the consent of the Fund trustees deems this to be in the interest of all Fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the Fund. When the suspension of trading relates to only certain assets held by the Fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued but, will delay liquidity on the affected portion of the Fund. If the Fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force the Manager to sell the underlying investments in a manner that may have a negative impact on remaining investors of the Fund.

Performance information

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 30 November 2020. Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager. Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Total Expense Ratio (TER) and Transaction Costs (TC) = Total Investment Charge (TIC) and other fees

The TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER is a measure of the actual expenses incurred by the fund over a one and three-year period (annualised). This includes the TER charged by any underlying fund(s) held as part of this Fund. A high TER does not necessarily imply a poor return nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TER's.

Transaction costs are disclosed separately. Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The sum of the TER and Transaction Costs is shown as the Total Investment Charge (TIC).

Annual management fee: The Fund charges a fixed annual management fee (i.e. fee class) as a percentage of the assets under management, to ensure a simple and understandable fee structure. The Fund invests primarily in segregated mandates but may also invest in other unit trusts i.e. "Underlying Fund Fees", which are included in the Total Expense Ratio (TER). The annual management fee is accrued daily and paid on a monthly basis.

Advice fees: If an investor appoints an adviser, advice fees are contracted directly between the investor and the adviser. The Manager will facilitate the collection of advice fees only upon receiving an investors instruction to do so. Initial advice fees up to a maximum of 3.45% are collected prior to units being purchased and ongoing advice fees up to a maximum of 1.15% are collected monthly through the redemption of units held by an investor in the Fund. An investor may cancel the instruction to facilitate the payment of advice fees at any time.

STANLIB Multi-Manager does not provide financial advice

The investments of this portfolio are managed, on behalf of the Manager, by STANLIB Multi-Manager a division of STANLIB Asset Management (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 719, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.
