STANLIB

As at 30.09.2020

INVESTMENT OBJECTIVES

This is a flexible, multi-asset class solution with a focus on including the potential for reasonable capital growth over the medium term.

- To achieve a return of inflation +3% p.a over rolling three-year periods
- Aim to preserve capital over any rolling three-year period

INVESTMENT APPROACH

The solution is managed by STANLIB Multi-Manager and adopts the balanced approach to investing.

We have elected to use multi-asset class portfolios (funds) with limited constraints and maximum flexibility, in order to allow asset managers maximum freedom to add value through asset allocation (strategic and tactical) and security selection (across asset classes). By selecting portfolio managers with demonstrable skill in these areas, we aim to maximise the potential to outperform the investment objectives as stated above.

Underlying funds in the solution are Regulation 28 compliant.

INVESTOR PROFILE

The solution is suitable for investors:

- Seeking a conservative portfolio with potential for capital growth
- Seeking a reasonable real rate of return over three years and longer
- Low tolerance for capital loss over the short term
