

STANLIB Multi-Manager Diversified Equity Fund of Funds

Minimum Disclosure Document

As at 31.03.2019

STANLIB

STANLIB Multi-Manager (Pty) Ltd

STANLIB Multi-Manager (Pty) Ltd was established in 1999 and is the centre of excellence for multi-managed solutions within STANLIB. The investment team, led by Chief Investment Officer Joao Frasco, consists of an experienced team with a diverse set of investment skills. We have offices in Johannesburg and London, and currently have mandates in excess of R150 billion under stewardship.

What is the Fund's objective?

The Fund's investment objective is to provide long-term capital growth through investment in local and global equity markets. It aims to outperform CPI (South African Inflation) plus 7% p.a. (i.e. to provide a real return of 7% p.a.) over rolling 7-year periods, with a low probability of capital loss over the long-term.

Risk profile

■ Income assets ■ Growth assets

What are the investment guidelines?

The Fund is a fully invested, multi-managed equity portfolio.

The Fund's minimum total equity exposure is 80% of the market value of the portfolio – as per the ASISA South African – Equity – General category as amended from time to time.

Fund's Composite Benchmark / Strategic Asset Allocation: SA Equity (FTSE/JSE Capped SWIX) – 75%, Global Equities (MSCI AC World IMI (ZAR)) – 25%.

The Fund complies with provisions of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) and the Regulations thereto, as amended from time to time.

The Fund is not Regulation 28 compliant.

How is the Fund managed?

The Fund is designed to deliver superior investment returns more consistently than through a single asset manager or mandate. Our approach allows investors' to outsource the fund / manager selection decision, which includes the ongoing due diligence of managers and construction of portfolios, to meet pre-defined objectives over time.

The Fund forms part of our goals-based range

The Fund forms part of a comprehensive goals-based range.

	Growth assets vs defensive assets*	Indicative volatility range	Investment objective
STANLIB Multi-Manager Enhanced Yield Fund	0% 100%	0.3% - 0.6% p.a.	To outperform the STeFI Composite
STANLIB Multi-Manager Low Equity FoF	30% 70%	3% - 6% p.a.	CPI + 3% p.a. over 3-year rolling periods
STANLIB Multi-Manager Medium Equity FoF	55% 45%	5% - 10% p.a.	CPI + 4% p.a. over 4-year rolling periods
STANLIB Multi-Manager Medium-High Equity FoF	68% 32%	6% - 12% p.a.	CPI + 5% p.a. over 5-year rolling periods
STANLIB Multi-Manager High Equity FoF	78% 22%	7% - 14% p.a.	CPI + 6% p.a. over 6-year rolling periods
STANLIB Multi-Manager Diversified Equity FoF	100% 0%	10% - 20% p.a.	CPI + 7% p.a. over 7-year rolling periods

*Growth assets are defined as equities and listed property

How do we approach risk management in the Fund?

Risk management is a fundamental component of our investment philosophy and process and is therefore approached holistically. It permeates every part of our investment process, requiring participation and accountability from all individuals involved in the process.

As a multi-manager, our risk management process begins at the time of portfolio specification and design, because by the time securities are included in the portfolio by the underlying managers, one has already accepted the risks and has limited ability to mitigate them. Our process then moves to manager research and portfolio construction, where we seek to know the managers intimately and construct a portfolio to behave in line with our broader investment objectives.

"Risks Inherent in our Funds" is a document that classifies the sources of risk associated with the management of our Funds. It can be obtained from the website www.stanlibmultimanager.com.

Underlying manger/fund framework

The manager framework currently constitutes the following managers within the respective specialist building blocks:

Property	Equity	Offshore
Catalyst	Coronation	Allan Gray
STANLIB	STANLIB	Nedgroup Entrepreneur
Bridge	Foord	Hosking Partners
Sesfikile	Prudential	Sanders
	Visio	Arrowstreet Capital
	Truffle	Alliance Bernstein

Information to be considered before investing

The STANLIB Multi-Manager Diversified Equity Fund of Funds (FoF) should be considered a medium to long-term investment. A FoF invests in other collective investment schemes, which levies its own charges and which could result in a higher fee structure for the FoF. The value of units (participatory interest) may go down as well as up and past performance is not necessarily a guide to the future. Where exposure to foreign investments is included in the portfolio, there may be additional risks, such as possible constraints on liquidity and the return of funds to South Africa, macroeconomic risks, political risks, tax risks, settlement risks and possible limitations on the availability of market information. The FoF is traded at ruling prices using forward pricing and can engage in borrowing up to 10% of the market value of the portfolio to bridge insufficient liquidity as a result of the redemption of participatory interests and may engage in scrip lending. A schedule of fees and charges and maximum commissions is available on request from STANLIB Collective Investments (RF) Pty Ltd (the Manco). Commission and incentives may be paid and if so, would be included in the overall costs. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Liberty is a full member of the Association for Savings and Investments of South Africa. The Manco is a member of the Liberty Group of Companies.

Unit price – how it works

Collective Investment Schemes (i.e. “Unit Trusts”) are traded at ruling prices set on every trading day. Forward pricing is used which means Fund valuations take place at approximately 15h00 each business day, and your instructions are therefore processed at prices that are not yet determined when your instructions are received. Instructions must reach the Management Company before 13h00 to ensure same day value. The 13h00 cut-off time only applies to investments and switches. Repurchases will receive the price of the same day if received prior to 15h00. The money market funds are valued at 12h00. The funds of funds and feeder funds are valued at 24h00 and 17h00.

The payment of withdrawals may be delayed in extraordinary circumstances, when the Manco with the consent of the Fund trustees deems this to be in the interest of all Fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the Fund. When the suspension of trading relates to only certain assets held by the Fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the Fund. If the Fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force the Manco to sell the underlying investments in a manner that may have a negative impact on remaining investors of the Fund.

Performance information on the monthly factsheet

Performance is calculated by STANLIB Multi-Manager (Pty) Ltd as at month end for a lump sum investment using net asset value (NAV) prices with income reinvestments done on the ex-dividend date. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs including manager fees, and trading costs incurred within the Fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the weighted average compound growth rate over the performance period measured. Past investment returns are not indicative of future returns and no guarantee is provided with respect to capital or return of the Fund.

Total Expense Ratio (TER) and Transaction Costs (TC) = Total Investment Charge (TIC)

The TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio for a rolling 36-month period to the previous quarter end (December, March, June and September). This includes the TER charged by any underlying fund(s) held as part of this Fund. A high TER does not necessarily imply a poor return nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TER's – expenses vary and the performance fee component can fluctuate over time.

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The sum of the TER and Transaction Costs is shown as the Total Investment Charge (TIC).

Management fee

The Fund charges a fixed annual management fee (i.e. fee class) as a percentage of the assets under management, to ensure a simple and understandable fee structure.

Underlying performance fees

STANLIB Multi-Manager (Pty) Ltd does not earn any performance fees. In addition to earning fixed fees, the underlying manager(s)/fund(s) may also earn performance-based fees if they outperform a specific benchmark. The performance-fee methodology of the underlying manager(s) / fund(s) is incorporated in their respective mandates. You can obtain more information on the underlying performance fee methodologies on the website www.stanlibmultimanager.com.

The annual management fee is accrued daily and performance fees are accrued monthly – both paid on a monthly basis (with the exception of some performance fees which are paid annually).

STANLIB Multi-Manager (Pty) Ltd does not provide financial advice

STANLIB Multi-Manager (Pty) Ltd is an authorised Financial Services Provider licenced under the Financial Advisory and Intermediary Services Act, 37 of 2002. FSP licence No.26/10/763. This information does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Independent financial advice should always be sought before making an investment decision.

If you appoint an adviser, advice fees are contracted directly between you and the adviser. We will facilitate the collection of advice fees (including initial advice fees up to a maximum of 3.00%) only upon receiving your instruction. You may cancel the instruction to facilitate the payment of advice fees at any time.

Where can I find additional information?

Additional information such as brochures, application forms and annual or quarterly reports, can be obtained from the websites: www.stanlib.com / www.stanlibmultimanager.com.

The prices of Funds are calculated and published on each working day. These prices are also available on the websites and in South African printed news media.

Investment Description

The Fund's investment objective is to provide long-term capital growth through investment in local and global equity markets. It is a fully invested, multi-managed equity portfolio managed within the guidelines of the ASISA South African Equity General Sector. The Fund has a strategic Allocation to the STANLIB Multi-Manager Global Equity fund.

The Fund aims to achieve CPI+7% p.a over 7-year rolling periods.

The Fund is not regulation 28 compliant, however it complies to exchange controls regarding the maximum allocation to global.

Suitable Investors

- Who wish to diversify single manager risk
- Who want a managed solution matched to their risk profile
- Who want maximum exposure to growth assets and are not concerned with capital fluctuations in the short term
- Who typically have an investment horizon of at least seven years

FUND INFORMATION TO BE CONSIDERED BEFORE INVESTING

The STANLIB Multi-Manager Diversified Equity Fund of Funds (FoF) should be considered a medium to long term investment. A FoF invests in other collective investment schemes (CISs), which levy their own charges and which could result in a higher fee structure for the FoF. The value of units (participatory interests) may go down as well as up and past performance is not necessarily a guide to future performance. Where foreign securities are included in the FoF it may as a result be exposed to macroeconomic, political, tax, settlement and illiquidity risks factors that may be different to similar investments in the South African market. The FoF is traded at ruling prices using forward pricing, and can engage in borrowing up to 10% of the market value of the portfolio to bridge insufficient liquidity as a result of the redemptions and may engage in scrip lending. A schedule of fees, charges and maximum commissions is available on request from STANLIB Collective Investments (RF) Pty Limited (the Manco). Commission and incentives may be paid and if so, would be included in the overall costs of the Fund. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Liberty is a full member of the Association for Savings and Investments South Africa (ASISA). The Manco is a member of the Liberty Group of Companies.

Market overview

Global equity markets recovered strongly from the significant selloff at the end of 2018, gaining 12.6% for the quarter as trade tensions between the two economic influences, US and China, eased. The ECB's decision to maintain lower interest rates and the announcement of a Chinese fiscal stimulus package also contributed positively to market liquidity and confidence. SA markets rallied 3.9%, driven primarily by resources, which gained 17.8% and in particular, iron ore, palladium and platinum. Low consumer confidence led to a 12% drop in retail shares. Notably higher quality rand hedges such as BTI, AB InBev and Richemont enjoyed a strong recovery from oversold levels. This has supported the overall Fund's outperformance relative to the index.

Portfolio review

The Fund outperformed its peer benchmark by 0.75% for the quarter and continued to maintain its pleasing long-term track record relative to peers.

At an underlying manager level, the Allan Gray SA Equity Fund returned 1.8% ahead of the index for the first quarter. Performance was driven in part by holding onto the MultiChoice Group shares that were unbundled from Naspers. While the Nedgroup Entrepreneur Fund underperformed the index benchmark, it outperformed peers. Positions in Naspers and BTI contributed to performance.

The STANLIB Multi-Manager SA Equity Fund returned 5.6% for the quarter outperforming the index benchmark by almost 1.7% and 3% alpha over 12 months. Most of the underlying managers outperformed the benchmark, with Coronation being the top performer for the quarter.

STANLIB Multi-Manager Global Equity underperformed the benchmark for the quarter. Overweight positions to emerging markets and financials dragged on performance. Sanders and AB were the two worst performers. Both allocation and selection detracted from their performance. Good performance from Sands continued with another positive quarter of alpha, where stock selection contributed strongly. The fund's one-year gross returns remain ahead of the benchmark.

Portfolio positioning and outlook

We caution that global equity markets are back to their highs, presenting some vulnerability especially as US economic activity is losing momentum. Going into quarter two, the Fund continues to have a small overweight position to global equity, and we will use rand weakness opportunities to trim this overweight. On the positive side, our underlying managers continue to see value in domestic shares. However, uncertainty surrounding the upcoming national elections and Brexit remain. The Fund is therefore, close to its strategic weight in local equities.
